

# Decision Points:

*Navigating the Implementation Journey to Water Reuse – A discussion with water utility leaders*

Implementing water reuse projects can pose challenges that generate an array of decision points, from governance and financing to operations and compliance to public acceptance and political support. Engage in a discussion with seasoned water professionals from internationally recognized water reuse utilities who will share their experience, and the insight gained, during their community’s journey to water reuse.

This workshop will also include a Collaborative Learning exercise looking at these challenges and identifying best practices to address them.

Moderator: Deirdre Finn, USA

Speakers: Scott Schladweiler, P.E., Tucson Water, USA, Gurdev Singh, Singapore PUB, Michael Killick, City of Cape Town, SA, Rowan Adams, City of Windhoek, Namibia (invited)

*Only for registered delegates*
